

Discover Why Our Clients Choose Exerve

"Exerve is an integral part of our team - making use of the CIO-service offering - growing and expanding our company and our capabilities. The quality and know-how provided by Exerve is by far superior to anything a typical smaller/mid-size company could expect from its own staff."

"We are very excited. So far all of our expectations have been exceeded!"

"You exhibit patience, understanding, and knowledge of product in an industry not particularly known for those traits."

"The Detailed Service History allows us to review and analyze all our past service work."

- Inventory & Distribution Management
- Sales & Service Management
- Rental Management
- Job Costing
- And much more

Service

Proactive Closed-Loop Support™

Service is the defining characteristic of a software company. Exerve has over 30 years of combined experience in using and supporting software under real world conditions. We are dedicated to providing proactive, expert services to our clients. Beyond just answering questions about how software works, we provide advanced proactive solutions to solve problems before they occur. With Exerve's support, your software provides solutions without headaches.

Rent-a-CIO™

What if you could rent your CIO - Chief Information Officer? What if your company had a person on call, who was actually part of your staff, who came to all the meetings, was an expert in every platform, networking, business processes, etc. - but instead of hiring that person, you rented their expertise for a low monthly fee? No fringe benefits, health insurance, 401ks, vacations - just the person you need, when you need them. Exerve can provide this for you.

Complete End-to-End Solutions for Your Business

Why Should You Consider Exerve

We know how software works - but more importantly - we have an intimate knowledge of how business works. We work with you and your team to help you free cash trapped inside your business functions. Our solutions extend key business functions throughout your operation and onto the Internet - combining the best of today's technology with years of robust functionality igniting business productivity, cost reductions, new market and organic sales growth.

Our solutions help you to be more competitive and profitable.

Return-On-Resources

Working with you, we reduce costs & increase profits by integrating back office functions with front office functions with customers and suppliers. We can achieve closed loop integration from point of sale to point of delivery, allowing your business resources to ebb & flow so that you balance your operating issues to meet market pressures more effectively than your competition.

Business Risk Minimization

Exerve specializes in helping businesses manage their daily operational risks by connecting key operational functions of your business together into one integrated business management solution. All of your business information and key business priorities and KPIs (key performance indicators) are available for instant review. Exerve increases your awareness, so you can address urgent business issues.

Long Term Investment – Long Term Partner

When you invest in our solutions, you are investing for the long term. You may never need another business software solution. Our solutions work great for small businesses and large businesses – from \$500 Thousand to \$500 Million. The average business changes accounting software every 3 to 7 years. We have clients that have been using our solutions for over 17 years, up their growth curve.

How You Get Started

Ignite Success™ Process

Exerve's trademarked Ignite Success™ Process walks you through a thorough analysis of your business and identifies key areas you can address to Ignite Business Success. Five simple steps help you get started.

Step One: Quick Questions - The process starts with 5 quick questions. These questions will quickly uncover the existence of hidden value in your business. Once we have answered these questions you will know if it is worthwhile to continue through the process.

Step Two: Deep Analysis - Process & Solution Plan - We identify the processes that should be deeply examined. The result of this process will be a business analysis summary and specific recommendations you should consider for your business.

Step Three: Cash Positive Solution Review - When considering time or dollar investments for your business today, you do not have years for your investment to pay dividends. You should focus on investments that are cash positive right now. Our Cash Positive Review will let us know if this is one of those investments for you.

Step Four: Solution Rollout - We are now at the decision point. Do you want to take action on our recommendations? If so, maybe you can do the work yourself. Or maybe you need our help. One of our end-to-end business solutions may make sense.

Step Five: Ignition, Success & Profit Review - You have done it. You have improved your business, optimized key processes, released cash trapped in your business processes and dramatically improved your profit situation. Let's look at the results, enjoy the feeling of success, and maybe there is more we can do.
